

# Sales Insights and Trends

Welcome to our comprehensive analysis of recent sales performance. This presentation will delve into key metrics, product line contributions, and deal size dynamics to provide actionable insights for our stakeholders.

# Overall Market Value (MSRP)

27K

Total MSRP

The total Manufacturer's Suggested Retail Price (MSRP) across all products stands at 27,000. This figure represents the combined market value of our entire product inventory.

# Product Line Overview

Our product portfolio spans a diverse range of categories, each contributing uniquely to our overall sales performance. Understanding the individual contributions of these product lines is crucial for strategic planning.

- Classic Cars
- Motorcycles
- Planes
- Ships
- Trains
- Trucks and Buses

# Total Sales by Deal Size

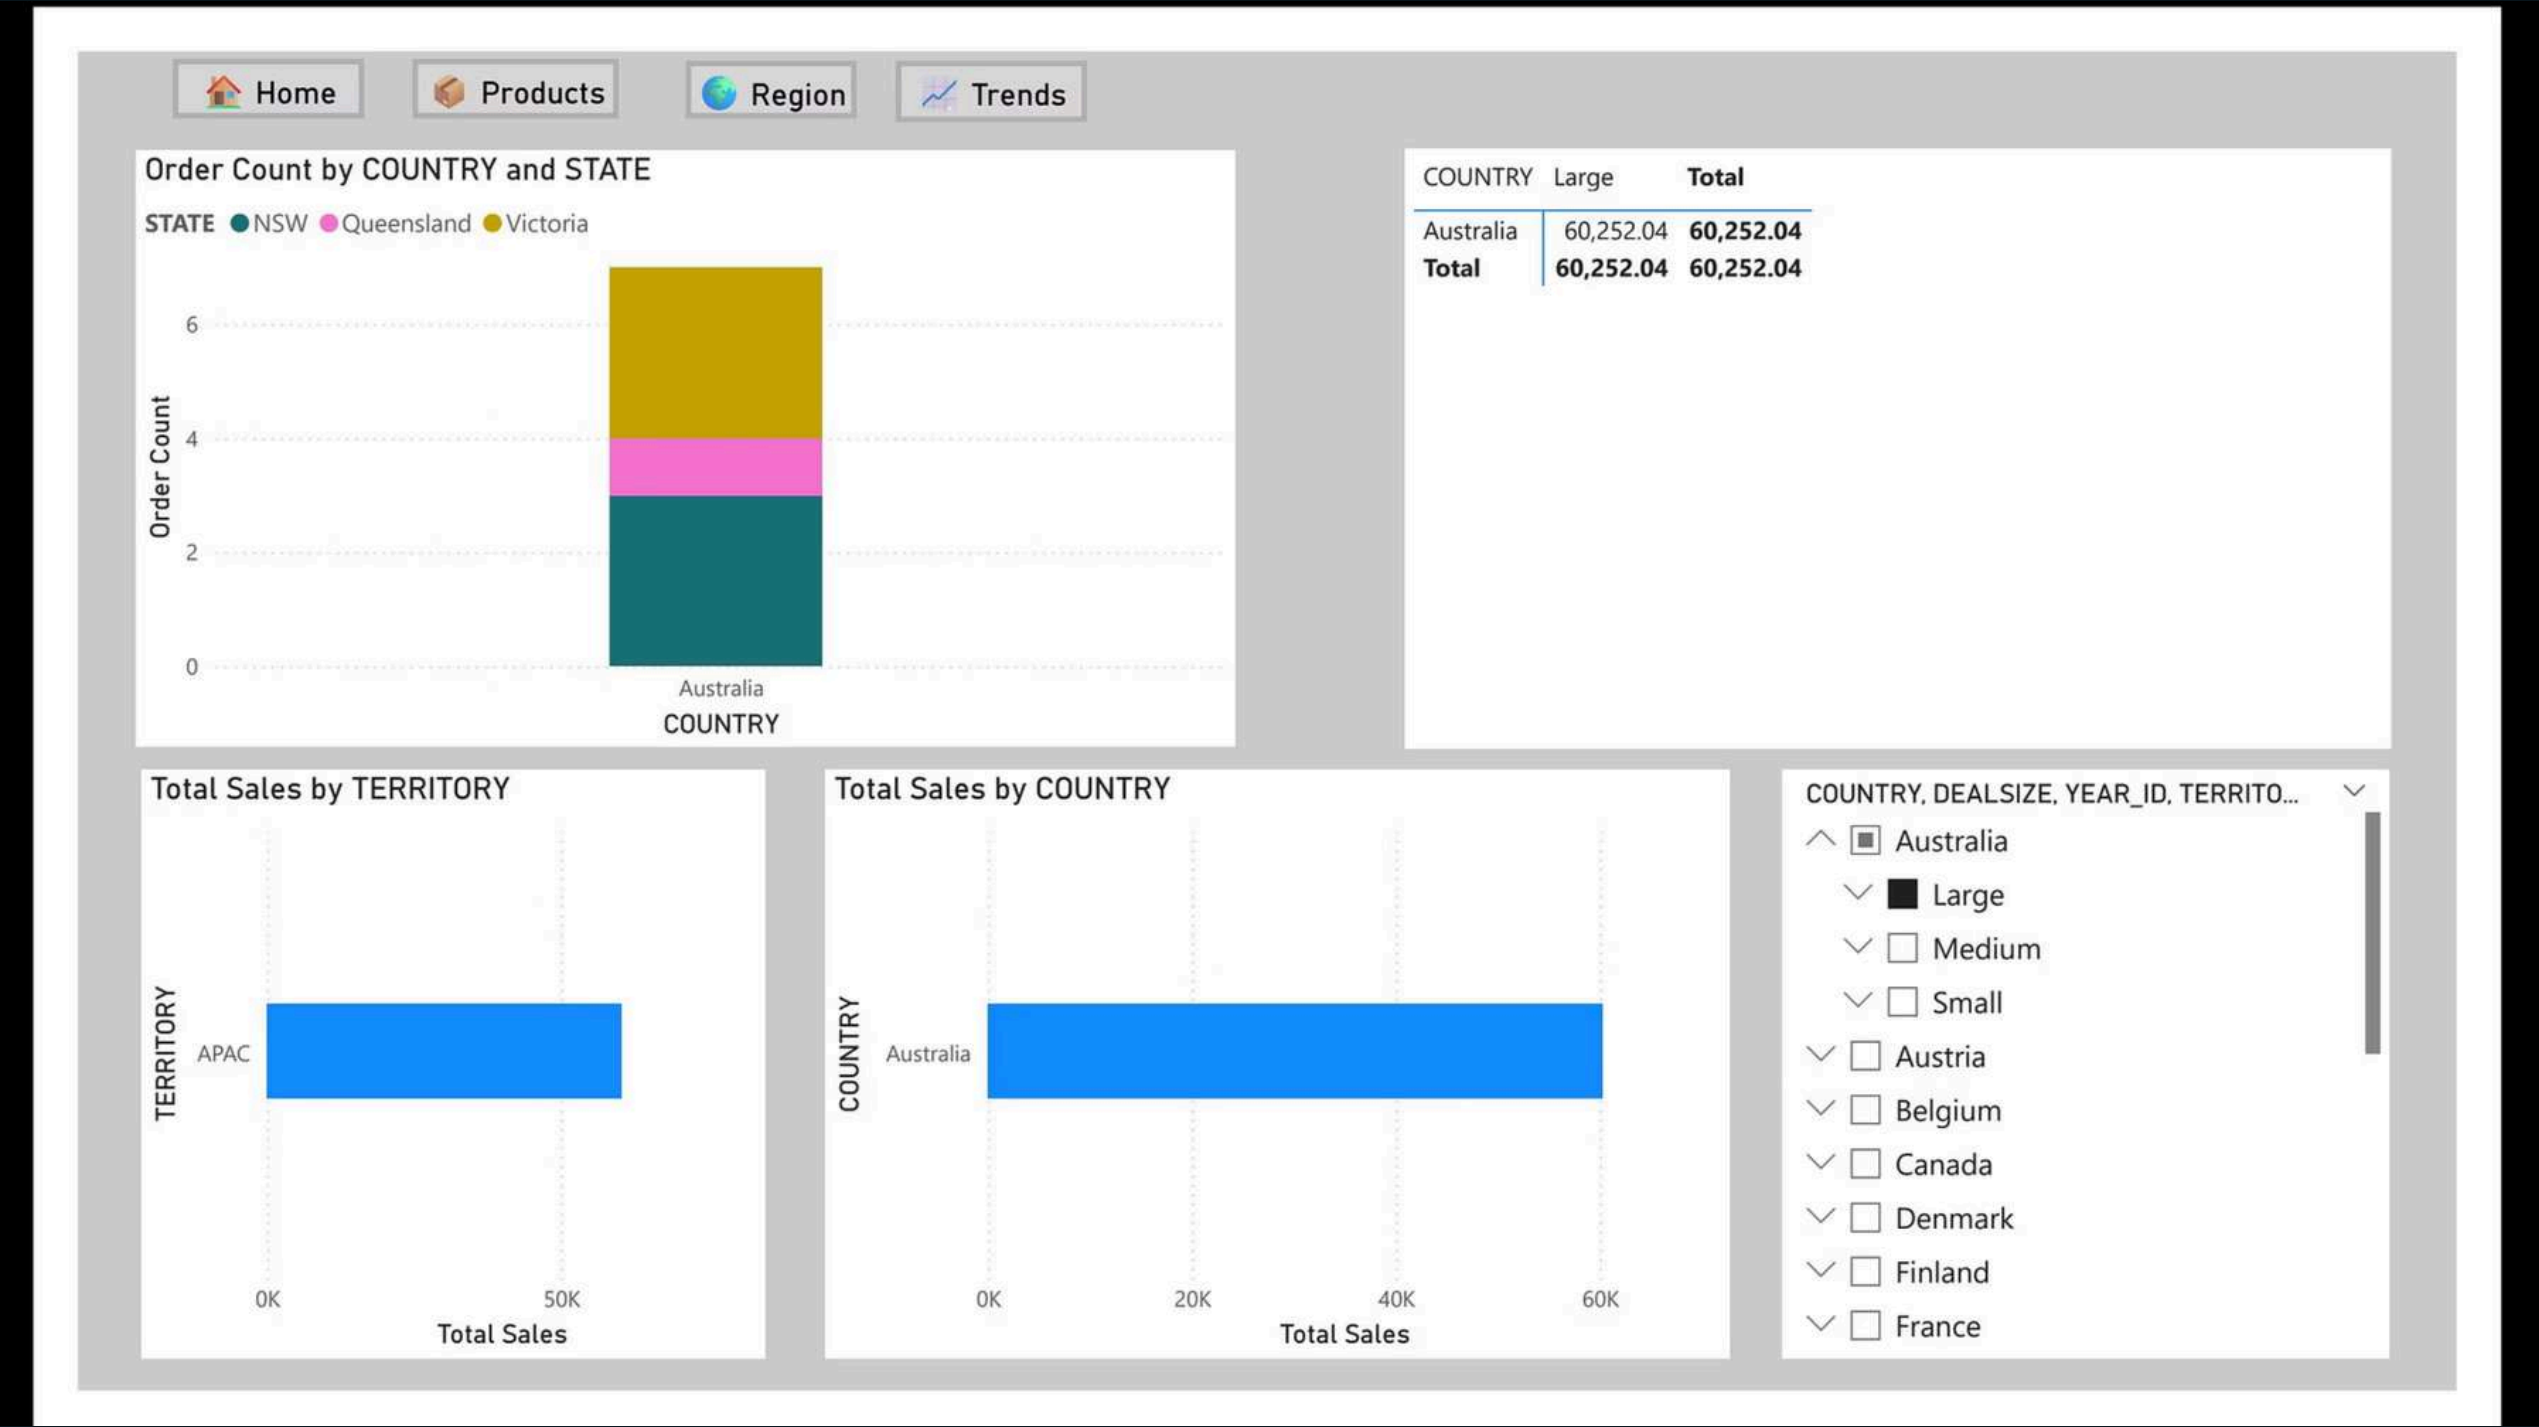

Sales performance varies significantly across different deal sizes. This chart illustrates how our revenue is distributed among small, medium, and large transactions, offering insights into our most lucrative segments.

# Product Performance Metrics

Analyzing sales and MSRP by product code and line reveals key performers and areas for improvement. The data highlights significant contributions from specific product lines, such as Planes.

Total	975,003.57	27,163	25,500
S72_1253	Planes	51,661.82	1,323
S700_4002	Planes	60,252.04	22,000

# Order Trends by Time

This chart shows the volume of orders categorized by year and month. It helps us understand seasonal sales patterns and long-term trends, crucial for forecasting and inventory management.

# Regional Product & Sales Trends

Sales performance varies across different regions and deal sizes. This slide summarizes the count of orders by year and total sales, broken down by deal size (small and medium).

Deal Size: Small

Count of Year ID: 98K

Total Sales: [Data from chart]

Deal Size: Medium

Count of Year ID: 147K

Total Sales: [Data from chart]
